

DL YACHTS : A NEW ERA BEGINS

DL YACHTS: A fascinating story of the sea, luxury and technology begins. A family of luxury yachts combining research, innovation and premium design is born.

DL YACHTS is pleased to unveil DREAMLINE, an exciting range of innovative yachts: 26M DREAMLINE and 30M DREAMLINE with a hull length below 24 meters, followed by models 34, 40, 46 and 49 metres.

Featuring highly distinctive solutions, endless passion and state-of-the-art design, DREAMLINE family originates from the 35 years' nautical experience of Mr. Peter Zuber, engineer and mastermind of the DL YACHTS shipbuilding philosophy.

His design and management team of skilled professionals is headed by Paolo Bencivenni, CEO of DL YACHTS, who says: "After several years of research we are proud to present an exceptional range of yachts aimed to impress the yacht owners worldwide. We are focused on innovative technology, eco-efficiency, unmatched level of quality, original design solutions providing the maximum level of comfort. Our goal is to guarantee the maximum pleasure of navigation while keeping an eye on beauty".

DL YACHTS DREAMLINE features special "lama chine waveless hull" designed by Giuseppe Arrabito at Arrabito Naval Architects. Its groundbreaking shape tremendously reduces fuel consumption (only 75 l/h at 12 knots in displacement trim) and allows remarkable range, up to 3500 nautical miles. In the same time, the yacht can develop up to 30 knots in semi-planning trim. EcoPerformance Technology powered by Siemens Hybrid makes navigation on 34M DREAMLINE pleasant and extremely silent. The noise and vibration level is barely perceived, both: of engines and generators.

Timeless and stylish interior and exterior design applied to spacious areas is introduced by renowned naval architect Enrico Gobbi at Team4Design. He perfectly combines original shapes with convenient functionality, providing any Dreamline yacht, from the smallest to the largest, with the maximum level of comfort.

Distinctive feature of 34M DREAMLINE is an impressive owner's cabin, offering a magnificent 180° panoramic sea view.

DL YACHTS manufactures a fully customized family of yachts in aluminium or fibreglass. The company owns a modern shipbuilding naval plant in the province of Ancona where during the summer 2014 26M DREAMLINE and 34M DREAMLINE will be officially launched. Both models will be available for viewing during Cannes and Monte-Carlo Boat-shows.

Sophisticated elegance, eco-friendly standards, ultra-premium execution and absolute comfort will make DREAMLINE a symbol of prestige and innovation throughout the world.
